Summary

Enthusiastic Computer Science student with strong technical skills in Python and C, specializing in Artificial Intelligence, Machine Learning, and Computer Vision. Proven ability to communicate effectively and lead teams towards achieving common objectives. Committed to developing AI-driven solutions that address real-world challenges and enhance technology accessibility.

Skills

- Python
- SQL
- Machine learning
- Team collaboration
- Time management
- C++
- Cloud computing
- Machine learning basics
- Agile methodology
- HTML and CSS proficiency
- Data structures
- Cybersecurity awareness
- Problem-solving

Experience

January 2025 to
February 2025

LoginwareSofttec.pvt.ltd

Bengaluru

Software Intern

- Developed software solutions through teamwork on coding tasks.
- Designed and implemented Mini Project House Surveillance System for effective monitoring.
- Utilized UBIDOTS framework to gain expertise in IoT device integration.

Education and Training

June 2025

Rns First Grade College

Bengaluru

Computer Applications Development

Bachelor of Computer Applications

- 9 CGPA
- **Created a project named *Vigilant Eye 2.0* with the objective of assisting farmers by detecting dangerous animal movements in agricultural areas using AI-based real-time surveillance.** The system was developed using **Python** and **YOLOv8 deep-learning models** for accurate object detection through **live camera feeds**, along with a **CustomTkinter GUI** for user interaction and an **SQL/MySQL database** for event logging. An **automated alarm and alert mechanism** was integrated to instantly notify users upon detection, helping reduce crop damage and enhance farm safety through intelligent monitoring.
